Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26–160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

SCHUBERT, N.D. 1984. The Indian food fishery of the Fraser River: 1983 summary. Can. Data Rep. Fish. Aquat. Sci. 479: v + 67p.

Weekly effort levels and catches of the five species of Pacific salmon, steelhead trout and sturgeon are reported for 23 fishing areas in the Fraser River Indian food fishery. Regulatory restrictions are summarized for all areas.

Key Words: effort, catch, Fraser River, Indian food fishery, regulatory restrictions.

Résumé

SCHUBERT, N.D. 1984. The Indian food fishery of the Fraser River: 1983 summary. Can. Data Rep. Fish. Aquat. Sci. 479: v + 67p.

Les efforts de pêche et les prises hebdomadaires des cinq espèces de saumon du Pacifique, de truites arc-en-ciel et d'esturgeons sont présentés pour 23 zones de pêche indienne de subsistance du fleuve Fraser. On résume aussi les limitations imposées dans toutes ces zones par la réglementation.

Mots-clés: effort de pêche, prises, fleuve Fraser, pêche de subsistance indienne, limitations de réglementation.

INTRODUCTION

The 1982 Commission on Pacific Fisheries Policy (Pearse, 1982) stressed the importance of annual documentation of management strategies for all fisheries. A record of strategies, which includes in-season changes to the preseason fishing plan as well as effort levels and catches, is essential to the objective evaluation of management decisions and to the ongoing development of management capabilities. Such a record was recently compiled for the Fraser River Indian food fishery for the period 1951 through 1982 (Schubert, 1983). The purpose of this report is to update that record for the 1983 fishing season. This report documents the 1983 preseason management plan, in-season changes to that plan, and weekly effort and catch levels in the twenty-three major fishing areas of the Fraser River Indian food fishery.

FISHING AREAS

The fishing areas described by Schubert (1983) were used in this report, except the boundary between Area two (Deas Island to Whonock) and Area three (Whonock to Hope) was changed to Mission from Whonock. This change recognizes the management of the 'Deas Island to Mission' area as a discrete unit with unique open and closed periods. Past catch and effort levels between Whonock and Mission were minor; therefore, annual comparisons will be largely unaffected.

DATA SOURCES

Estimates of catch and effort in the Indian food fishery are compiled on a weekly basis by local fishery officers. Assessment methodologies are sensitive to local fishery conditions and budgetary allocations and, as a result, vary from area to area and within areas through the year. Gear counts may be obtained during ground, water or aerial surveys, while catches may be derived from interviews with the fishermen, direct observation or gear subsamples. Although methods vary, each fishery is generally surveyed one or more times during a weekly open period. Catches are recorded from a proportion of the nets, and total catch for that opening is estimated by applying the observed catch per net to the total gear count.

MANAGEMENT PROCEDURE

The Indian food fishery in the Fraser River is regulated in order to provide a level of access to the available salmon resource sufficient to satisfy the reasonable food fish needs of each band while, at the same time, addressing the conservation requirements of the resource. A pattern of regulation has evolved which addresses fishery specific variations in stock abundance, gear efficiency and site effectiveness by varying between areas the duration of the weekly fishery. For example, the fishery in the lower Fraser River is limited

to three days per week because virtually every Fraser River stock is vulnerable to a gear well suited to the local river morphology. In contrast, the fishery in the Cariboo area (Churn Creek to Hixon, Chilcotin River system) is open seven days per week in recognition of the temporally and numerically limited stock availability, the relatively inefficient gear type traditionally used in the fishery, and the limited availability of effective fishing sites. The basic fishing plan for the Fraser River Indian food fishery, which has been largely unchanged since 1962, is detailed in Appendix 1.

This basic fishing plan may be altered if preseason stock expectations, developed by biologists of the Department of Fisheries and Oceans (chinook, coho and chum salmon) and the International Pacific Salmon Fisheries Commission (sockeye and pink salmon), project a conservation concern for any stock. In that case, the basic plan is modified in order to address the specific conservation concern, and meetings are scheduled with the appropriate bands and tribal councils to discuss any changes. The finalized preseason plan will then be altered only to address emergency in-season conservation concerns.

1983 PRESEASON MANAGEMENT PLAN

The preseason management plan developed for the 1983 Fraser River Indian food fishery (Appendix 2) addressed three specific concerns:

1. **Conservation of early and middle timing chinook stocks.** Two specific measures were implemented in the Indian food fishery to complement similar measures applied to the commercial and sport fisheries since 1980. First, fishing times in the major chinook interception areas downstream from Williams Creek (near Boston Bar) were reduced to one day/week until the arrival of the first sockeye stocks. This measure was intended to reduce harvest rates on early timing chinook stocks in the fisheries targeting specifically on chinook, with subsequent fishing returning to standard times to permit normal sockeye exploitation. And second, a maximum mesh size restriction of 152 mm (6 inches) was imposed after the arrival of sockeye to reduce incidental interceptions of middle timing chinook stocks during the targeted sockeye fisheries. This restriction was removed in mid September to permit the use of larger mesh nets during the chum migration period.

2. **Elimination of monofilament gill nets.** Nets constructed from nylon monofilament fibers were prohibited in 1983 as a general conservation measure intended to control gear efficiency. Monofilament gill nets are prohibited in all British Columbian coastal fisheries.

3. **Reduction in the maximum permissible drifted gill net length to 45.72 meters (25 fathoms).** A regularly scheduled drifted gill net fishery was established in 1978 on an experimental basis in the Steveston area. A review of this fishery after the 1982 season concluded that this gear was considerably more effective than the average gear used in the traditional upstream fisheries. The maximum permissible drifted gill net length was, therefore, reduced from 137 meters (75 fathoms) to 45.7 meters (25 fathoms).

1983 FINAL MANAGEMENT PLAN

The 1983 preseason fishing plan was modified in-season in response to two emergency requests from the International Pacific Salmon Fisheries Commission. The first, a system-wide closure of the Indian food fishery during the period 1200 h July 14 to 1200 h July 24, was implemented to protect an unusually poor return of early Stuart sockeye. The second change, a reduction in fishing time downstream from Williams Creek to one day/week during the period 1200 h August 15 to 1200 h August 22, was implemented to protect the middle timing sockeye stocks, especially Stellako sockeye. The final 1983 management plan is detailed in Appendix 3.

1983 CATCHES

Catches in the Fraser River Indian food fishery during 1983 are reported in detail in Appendices 4 and 5 and are summarized in Tables 1 and 2. The aggregate catch totalled approximately 483,100, the third highest on record after the 1982 and 1981 catches of 537,000 and 532,000, respectively. The bulk of the catch was taken in three areas: Mission to Hope (28%), Hope to North Bend (24%) and North Bend to Churn Creek (20%).

Sockeye were predominant in the catch with approximately 361,600 taken in 1983. This catch was considerably below the 1982 level (430,000) but was approximately 24% above the 1979 brood year catch of 292,000. Chinook catches totalled approximately 15,800, again, well below the 1982 level of 35,700 but near the brood year catch levels. The pink catch of approximately 84,900 was up 52% from the 1981 brood year catch 56,700 and was the largest on record in the Fraser River Indian food fishery. The 1983 coho catch totalled approximately 7,500, well below both the 1982 catch level and the 1980 brood year catch of 29,400. The 1983 chum catch of approximately 12,600 was also well below the 1982 level but was 47% higher than the 1979 brood year catch of approximately 8,200. Steelhead trout and sturgeon catches totalled 766 and 2,060 respectively.

	JUL 31 TO AUG 14	3.0	1200 THURS TO 1200 SUN	-
	AUG 21	1.0	1200 SAT TO 1200 SUN	CONSERVATION OF STELLAKO SOCKEYE
	AUG 28 TO APR 1/84	3.0	1200 THURS TO 1200 SUN	-
WILLIAMS CREEK TO PETCH CREEK	ALL YEAR	0	CLOSED	-
PETCH CREEK TO TEXAS CREEK (INCLUDING SHUSWAP RIVER AND THOMPSON RIVER FROM LYTTON TO SAVONA)	APR 3 TO JUL 10	4.0	0001 THURS TO 2400 SUN	-
	JUL 17	0.5	0001 THURS TO 1200 THURS	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 24	0.5	1200 SUN TO 2400 SUN	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 31 TO AUG 28	4.0	0001 THURS TO 2400 SUN	-
	SEP 4 TO OCT 3	5.0	0001 WED TO 2400 SUN	EXPLOITATION OF ADAMS SOCKEYE
	OCT 9 TO APR 1/84	4.0	0001 THURS TO 2400 SUN	-
TEXAS CREEK TO CHURN CREEK	APR 3 TO JUL 10	4.0	0001 MON TO 2400 THURS	-
	JUL 17	3.5	0001 MON TO 1200 THURS	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 24	0	CLOSED	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 31	4.0	0001 MON TO 2400 THURS	-
	AUG 7 TO AUG 28	5.0	0001 MON TO 2400 FRI	EXPLOITATION OF CHILKO SOCKEYE
	SEP 4 TO APR 1/84	4.0	0001 MON TO 2400 THURS	-
CHURN CREEK TO HIXON	APR 3 TO JUL 10	7.0	OPEN	-
	JUL 17	3.5	0001 MON TO 1200 THURS	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 24	0.5	1200 SUN TO 2400 SUN	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 31 TO APR 1/84	7.0	OPEN	-
ABOVE HIXON (INCLUDING NECHAKO RIVER SYSTEM)	APR 3 TO JUL 10	5.0	0001 MON TO 2400 FRI	-
	JUL 17	3.5	0001 MON TO 1200 THURS	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 24	0	CLOSED	CONSERVATION OF EARLY STUART SOCKEYE
	JUL 31 TO APR 1/84	5.0	0001 MON TO 2400 FRI	-
LILLOOET RIVER SYSTEM AND CHILCOTIN RIVER SYSTEM	ALL YEAR	7.0	OPEN	-

‡ ALL OPEN PERIODS ARE LISTED BY 'WEEK ENDING' PERIODS: FOR EXAMPLE. THE PERIOD DENOTED BY "WEEK ENDING JUL 10 TO JUL 17" INCLUDES ANY OPEN DAY BETWEEN JUL 4 AND JUL 17.

‡‡ OTHER THAN STANDARD TIMES REQUIRED FOR CONSERVATION AND ALLOCATION TO UPSTREAM BANDS.

APPENDIX 3. 1983 FINAL MANAGEMENT PLAN FOR THE FRASER RIVER INDIAN FOOD FISHERY. CONTINUED.

(ii) GEAR RESTRICTIONS

RESTRICTION	AREA	TIME PERIOD	REASON FOR RESTRICTION
USE OF MONOFILAMENT NYLON GILL NETS PROHIBITED	ENTIRE FRASER SYSTEM	ALL YEAR	GENERAL CONSERVATION
MAXIMUM SET GILL NET LENGTH OF 18.29 M (10 FATHOMS)	ENTIRE FRASER SYSTEM‡	ALL YEAR	GENERAL CONSERVATION
MAXIMUM DRIFTED GILL NET LENGTH OF 45.72 M (25 FATHOMS)	STEVESTON AREA‡‡	ALL YEAR	GENERAL CONSERVATION
MAXIMUM GILL NET MESH SIZE RESTRICTED TO 152 mm	STEVESTON AREA	0600 JUL 8 TO 0800 SEP 10	CONSERVATION OF MIDDLE TIMING CHINOOK
	DEAS TO MISSION BRIDGE (INCLUDING NORTH ARM UPSTREAM FROM KNIGHT STREET BRIDGE)	1200 JUL 4 TO 1200 SEP 15	CONSERVATION OF MIDDLE TIMING CHINOOK
	MISSION BRIDGE TO WILLIAMS CREEK	1200 JUL 7 TO 1200 SEP 18	CONSERVATION OF MIDDLE TIMING CHINOOK
	PETCH CREEK TO TEXAS CREEK	0001 JUL 7 TO 2400 SEP 18	CONSERVATION OF MIDDLE TIMING CHINOOK
	TEXAS CREEK TO CHURN CREEK	0001 JUL 4 TO 2400 SEP 15	CONSERVATION OF MIDDLE TIMING CHINOOK

‡ EXCEPT LILLOOET RIVER SYSTEM.
‡‡ THE STEVESTON AREA FISHERY IS THE ONLY REGULARLY SCHEDULED DRIFTED GILL NET FISHERY IN THE FRASER RIVER.

Appendix 4 (a). Weekly estimates of **chinook** catch and effort, by fishing area.
